Antique Acid Copper (Z05-02-04)

Black Acid Copper (Z05-02-05)

Verdigris Green Acid Copper
(Z05-02-06)

SPECIFICATION

Our copper finishes are subject to availability. Batch-to-batch variation in shade may occur within commercial tolerance. Some options may be subject to minimum quantities.

The technical specifications of copper finishes are as follows:

Composition: 100% Real Copper

Usage: interior accessories, lighting, bathtubs, and sinks.

Green Verdigris, Black, Brown and Antique Acid Finishes: These finishes are created by hand using chemicals to achieve the desired finish. The results are random and depend on how the chemicals react to the copper. The final finish has a lightly rough texture similar to fine sandpaper. No two products will ever be exactly the same.

Polished Finish: The surface is polished to a high mirror-like finish.

Satin Finish: The surface is rubbed with sandpaper and wire wool to create a dulled satin finish.

A clear matt protective coating is applied over all finishes
